MEDICAHEALTH

MEDICA HEALTH INTERNATIONAL INTRODUCES...

MHI have selected a range of high-quality wellness products which are used worldwide by medical centres of excellence, clinical practices, therapists and individuals alongside our Theragem® Collection. We have carefully chosen these successful complementary tools as they adhere to our values, offering non-invasive, holistic wellness options for an optimum homeostasis.

Whether you use these as a professional therapist or as part of a healthy family life-style, all products are easy to use, and give fast, reliable and positive results.

NATURAL WATER

Water is the source of all life on Earth. By studying groundwater flow patterns in the natural aquatic environment, scientists have learned which forces and systems naturally clean and structure water.

In our bodies, natural water is a disease-relieving factor, and is vital in obtaining and maintaining optimum health and wellness. From birth, human beings are comprised of approximately 75% water, but as we age, this can diminish to around 55%.

As water exits the human pelvis in a natural double spiral, so it must also run in our veins if our bodies are to function well.

Research suggests that unstructured water is one of the reasons so many people are sick. Water can become damaged as it travels through pipes and by the addition of chemicals such as chlorine and other disinfecting agents. Many pump systems also create an imbalance in water's original structure.

Inventor Viktor Schauberger originally made these discoveries in the 1930s and diagnosed 'implosion technology' as the future of energy and life.

LIVING WATER VORTEXÉR: ENERGISED WATER JUG

The Vortexér jug has been created and developed in line with Schauberger's research, but with all the benefits of today's cutting edge-technology. The silver, leaf-shaped propeller transforms water molecules to structured, clustered water by the direction, speed, and egg-form of the jug. The water also gets information through a silver bolt in the lower section, in connection with different energy constructions.

Frozen water droplets before and after treatment with the Vortexér.

What negative information can be in our tap water before the Vortexér is used?

Information enters water through physical contact with substances, such as medication. The substances are chemically filtered out during the drinking water purification process. However, the information of these substances remains imprinted in the water.

Information can also end up in the water without physical contact, such as through radiation or through human emotions.

Water stores information via the structure of the water molecule clusters. The water molecules are restructured and neutralised by the Vortex during the purification process.

LIVING WATER

Vortexér

Available in
2 colours:

-  Aqua
-  Grey

1

The Vortexér neutralises the water. Scientists have determined that water stores information. This information can be unhealthy for the human body. The Vortexér restructures the water molecules so that the information in the water is completely neutralised.

THE VORTEX HAS THREE MAIN HEALTH BENEFITS...

2

The Vortexér vitalises the water. The Vortexér provides an inward-rotation, left-turning spiral-shaped movement that generates life energy. Schauberger calls this an “implosion” (as opposed to an explosion that has an outward movement such as combustion or nuclear fission and thereby destroys life energy). This life energy is called Chi or Prana; vitalised water has a high Bovis value.

3

The Vortexér makes pollution harmless. Because oxygen is supplied during rotation, light contaminants (such as heavy metals or chlorine that are present in tap water in many countries) are partly rendered harmless or disappear in the form of gas. The silver propeller has antiseptic, anti-inflammatory properties, especially when activated with Theragem® Crystal Light Fusion Technology.

BOVIS MEASUREMENT

Every person has a Bovis value of 6,000-8,000. Water from the tap or from a plastic bottle is almost always lower (3,500-5,000). This water does not help to increase your life energy level. The Bovis value of Vortexér water varies from 10,000 to 15,000, so that your body stays healthy (or becomes healthier).

Example	Bovis
Our body	6000 - 8000
Tap water in Denmark	7000 - 9000
Bottled mineral water	2000 - 5500
Vegetables in stores	2000 - 7000
Organic vegetables	7000 - 12.000
Living Water Vortexér Jug (1999 model)	12.000
Living Water Vortexér 2019	14.000 - 16.000
Theragem® Encoded Vortexéd water	21.000 - 25.000
Theragem® Encoder	60.000 - 65.000

PH BALANCE

Living Water Vortexér water becomes more alkaline, increasing its pH, during treatment. Water's ability to absorb large quantities of oxygen, makes it capable of neutralising many of today's acid-inducing foods, and restoring natural balance in the body.

STRUCTURED WATER

Structured water can dissolve the salts and minerals in food and distribute them properly in the body's cells and carry away waste products. Treated water can also be used in the household as a beverage.

You can save a lot of tea and coffee beans and obtain a fresher, better taste. Place vegetables and fruits into the treated water to remove any pesticide spray residues and use it for cooking.

Drinking a sufficient amount of daily water becomes easy as the treatment softens the water, making it go down much easier. It is absorbed quickly into the body due to its modified structure. Remember, you need 1 litre (1 quart) of water for every 30 kg (66 pounds) of body weight in a 24 hour period in order to function properly. Coffee, tea, soda water and alcohol do not count.

OPERATING INSTRUCTIONS

Press the left button to begin the first program. The Vortexér process takes around 3 minutes 30 seconds. Use this button for the first month. Start with one glass per day, building slowly up to 1 litre/30 kg bodyweight.

The centre button is for light polluted water. You can activate this process up to 3 times to treat the water. This program is best used for contaminated and chlorinated water. This program takes a total of 14 minutes. You can revert to using the left button if your body is not ready for the higher Bovis energy.

The right button with the Hz symbol is pre-programmed for water with higher Bovis energy. This program can be used after your body becomes acclimatised to the restructured water.

The cap opens to a USB-C battery charger.

DURABILITY & MAINTENANCE

The water temperature drops after processing because of the left-turning implosion. It stays cool for a long time, and even after 24 hours, the quality remains intact.

The water does not require refrigeration - the fresh taste is preserved, but if you do want to cool it, put the jug in the refrigerator without the lid on. The lid (which contains the motor) must never be cleaned in water, placed in a dishwasher or refrigerated as the electronic component can be damaged. The whole jug can be cleaned with soft tissue and soap.

THERAPEUTIC USE: ENCODING FOR THERAGEM® PRACTITIONERS

The Vortexér is unique in that whilst the water is being structured, it can be encoded with Theragem® Crystal Light Technology. Clear-Water and Medica Health Int. are grateful to be able to announce this important addition to aid in your health and wellness journey.

As an additional option, homoeopathic remedies can be installed in the bottom of the Vortexér. Whilst the water is being structured, the chosen remedies will be encoded within the water, aiding the healing process on a very deep level.

TECHNICAL INFORMATION

- Capacity: 1.8L
- Environmentally friendly non-toxic Ecozen bio-plastic
- Rechargeable, wireless to use up to 50 times
- Silver coated propeller and earthing plate, 30µm pure silver
- Different Vortex programs available
- Duration of the Vortex process depends on the water quality/program 3.3 to 7.3 minutes
- The Vortexer is covered by a 2-year warranty on materials and construction

OUR VISION

We are constantly working to introduce natural, earth-friendly biotechnology to the general public. We create, source and manufacture the highest quality products in order to detoxify ourselves, our surroundings and land from the pollution of industrial society.

The system is based on Viktor Schauberger's studies of nature and water purification, as well as the work of Gerald Pollack, Masuda Emoto, and independent Danish inventors.
